

Maple Minis

Caring for Babies and Toddlers

At Maple Minis Nursery we care for babies and toddlers and ensure their health, safety and well-being through the following:

- At least half of the staff team caring for children under the age of two will have undertaken specific training for working with babies
- Care is taken to ensure that babies and toddlers do not have access to activities containing small pieces, which may be swallowed or otherwise injure the child
- The environment and equipment are checked daily before the children access the area. This includes checking the stability of cots and areas around, low/highchairs and ensuring restraints on these, pushchairs and prams are intact and working
- All doors are fitted with viewing panels and door finger-guards to ensure the safety of children
- Outdoor shoes are removed or covered when entering the baby and toddler area(s). Staff remind parents and visitors to adhere to this procedure
- Babies and toddlers have their nappies changed according to their individual needs and requirements by their key person wherever possible
- Information will be shared between parents and the key person about nappy changing and toilet training in a way that suits the child
- Changing mats are wiped with anti-bacterial cleanser before and after every nappy change.
- Each baby must have his/her own bedding which is washed at least weekly and when necessary
- Cot mattresses meet safety standards
- Children under two years are not be given pillows, cot bumpers or any soft furnishings in order to prevent risk of suffocation
- We follow all cot death prevention/safety guidelines and advise parents of this information. Babies are always laid to sleep on their back, with their feet touching the foot of the cot
- Sheets or thin blankets will come no higher than the baby's shoulders, to prevent them wriggling under the covers. We make sure the covers are securely tucked in so they cannot slip over the baby's head
- Cots are checked before use to ensure no items are within reach i.e. hanging over or beside the cot (e.g. fly nets, cables, cord blinds)
- All low/highchairs used for feeding are fitted with restraints and these are used at all times. Children are never left unattended in high chairs. Restraints are removed and washed weekly or as needed
- No child is ever left unattended during nappy changing time
- Babies sleeping outside only do so whilst a member of staff is present and prams must lie flat so children are supported
- Sleeping children are supervised at all times
- Babies sleep times are documented on the working daily notes and all sleeping babies remain visible at all times.
- Staff do not change nappies whilst pregnant until a risk assessment has been discussed and conducted.

- Where food/milk is prepared for babies there is a separate area within the kitchen which is specifically designated for this preparation
- Bottles of formula milk are only made up as and when the child needs them. These should be cooled to body temperature, which means they should feel warm or cool, but not hot, and always checked before giving to a baby.
- Following the Department of Health guidelines, we only use recently boiled water to make formula bottles (left for no longer than 30 minutes to cool). We do not use cooled boiled water that is reheated.
- We have a milk preparation machine in nursery which is used as per instructions.
- The mothers are responsible for thoroughly washing and sterilising the bottles and teats, this is demonstrated during the parenting sessions prior to having their baby. Nursery provides a steam steriliser, washing equipment and spare bottles if required.
- Contents of bottles are disposed of after two hours, nursery also documents what time the formula feed is prepared and how much the baby has taken during the feed.
- A designated area is available for mothers who wish to breastfeed their babies or express milk
- Labelled mothers' breast milk is stored in the fridge
- If dummies are used, they will be cleaned and sterilised. This also applies to dummies which have been dropped (see separate dummy policy)
- All dummies are stored in separate labelled containers to ensure no cross-contamination occurs
- Pushchairs are regularly checked and the blankets laundered.
- Babies are never left propped up with bottles as it is both dangerous and inappropriate
