

# Maple Medical PRU *Young Parents' Centre*

## Students

Like most nurseries we occasionally have students working here with the babies. This gives an opportunity for them to gain first-hand experience and is good for the babies who benefit from the extra attention. Students are always supervised.

Occasionally, individual students aged 17 and over who are on long-term placements may be included in the ratios if we are satisfied they are competent and responsible.

All students and staff will be subject to a DBS check.

As part of their college work, students may wish to observe specific babies. Permission will always be sought from the young mums before this happens.
